Revenue Sensitivity Grid (Fixed Scenarios)

PriceChange	-10	0	10
-10	\$2,257.4K	\$2,508.2K	\$2,759.0K
-5		\$2,584.5K	
0	\$2,388.7K	\$2,654.2K	\$2,919.6K
5		\$2,717.2K	
10	\$2,496.2K	\$2,773.6K	\$3,051.0K

"Model assumes price elasticity of -0.5 (a 1% price increase reduces unit demand by 0.5%). Demand Shift % represents an independent manual adjustment for external factors (marketing, competition, seasonality) layered on top of the price effect. Scenario figures use average unit price across the product mix; they will not exactly reconcile to summed actual revenue."
